Experienced test Analyst with around 10 years of expertise, specializing in manual & automation test analysis. Demonstrated ability to improve regression test suite, reducing release cycle with automation, framework development. Proficient in using SQL and Python3. Experienced working with tools like postman, jira, git, testrail, shell scripting, intellij IDE, jenkins(CI/CD, release cycle). Developed a deep understanding of software development life cycle worked with various testing methodologies , Agile, scrum , waterfall. Expertise in designing & executing test plans that covers all aspects.

PROFESSIONAL EXPERIENCE

Foxtel Group (Australia) 02/2022 – Continuing

Platform Test Analyst

Functional API testing for microservices like different play API for streaming services, GAM(google AD manager) Proxy Manual testing for new features using Postman. Automation testing using groovy, python3 Automation framework development for microservice GAM Proxy, to generate test cases using python3 Test Plan for new features Issue reporting & tracking using Jira. Developed and maintained test cases, test design. Provided training and mentorship to junior test analysts. Test case maintain, monitor services, improve testing procedures, documentation, review Prepare test environment, deploy new versions using argo CD

Stibo DX, Dhaka, Bangladesh 12/2014 – 02/2022

Software Engineer in Test

Manual functional, non functional testing for both frontend & backend services (CUE, CUE Print : content management service) Automation test framework development for web service testing using groovy script , tool: SoapUI Automate for front end regression test suite using RobotFramework & Selenium Bug findings, issue tracking using Jira Test case design, improdfdfsve, maintain, documentation, review Prepare test environment , deploying new versions using SAAS tools Release cycle maintain using jenkins, CI/CD

Samsung R&D Center, Bangladesh 08/2012 – 12/2014

Software Engineer

API testing for TIZEN OS using BITAL framework (TIZEN SDK, c++) IDE testing, API and UI testing.

EDUCATION

B. Sc | Computer Science & Engineering | Bangladesh University of Engineering & Technology

SSC & HSC | Science | Mirzapur Cadet College

SKILLS

API testing, POSTMAN(web service, microservice manual & automation testing) Python3, shell scripting, Postgrresql, GIT, JIRA, Robot Framework, Selenium, groovy Wiremock, Kibana, NewRelic Expertise in SQL/Pandas : StrataScratch Problem solving: leetcode, UVA github page
